

900DB

Clean and minimalist in design, the stainless steel zero clearance Firebox 900DB is easy to install, and features a unique see-through element. The double-sided design features a toughened glass back panel.

The variety of installation options include front or back fitted, plus with or without an exposed flange. It offers home renovators, developers, builders and interior designers the flexibility to achieve the look they want. The Firebox 900DB is used in construction of the EcoSmart Vision, and is the ideal choice for indoor installations in apartments, houses, and commercial premises including offices, restaurants and bars where it can be used as an attractive window feature.
