Fire  
www.ecosmartfire.com

Blending the simplicity of an outdoor fire pit with the functionality of a standalone table, EcoSmart's Wharf fire table adds style and practicality to any architectural environment.

Ideal for courtyards, patios, pool decks and terraces, the all-weather, earthy design evokes the atmosphere of an open flame minus the by-products associated with a wood-burning fireplace. Its natural colour palette and perfect blend of fire and stone make it an easy choice for landscape architects and design professionals.

## Key Features

### Talking Point

EcoSmart's flickering flame creates an instant focal – and talking – point for outdoor entertaining spaces.

### All-weather Earthy Design

Evokes the atmosphere of an open fire minus the mess, odour, sparks and soot.

### Mesmerising Flame

Like a traditional campfire, the dancing flame provides an enticing welcome when entertaining guests.

### Clean-burning Fireplace

Unlike wood burning fire pits, there is no need to sweep up ash after using the Wharf fire pit.

MODEL	MATERIALS	COLOURS	COMPATIBLE BURNER	VOLUME CAPACITY	HEATS ON AVERAGE	APPROX. BURN TIME	ACCESSORIES AVAILABLE
